Education

M.S. in Business Analytics, Boston University, Questrom School of Business, Boston, MA | Expected Jan 2027

BBA in Entrepreneurship and Innovation Management, Temple University, Fox School of Business, Philadelphia, PA | May 2023

Work Experience

Business Analyst, Maratech NMR Solutions, Cambridge, MA | Apr 2024 – Aug 2025

- Reduced operational costs by 10% through financial and vendor analysis.
- Built dashboards delivering weekly performance updates to stakeholders, improving transparency and coordination.
- Partnered with three departments to translate business needs into requirements and align workflows with company goals.
- Improved client material-transfer workflows, increasing efficiency across two departments.

Associate Business Analyst, Flask Scientific, Cambridge, MA | May 2023 – Apr 2024

- Analyzed pricing across ten competitors and implemented a new pricing model that increased first-quarter sales by 12%.
- Designed and launched an e-commerce site with a three-person team, generating over 1,000 visits in the first month.
- Coordinated the rollout with five clients and adjusted delivery timelines based on structured feedback.

Operations & Strategy Intern, Neftwerk Inc, Philadelphia, PA | Aug 2022 – Dec 2022

- Accelerated product launch timelines by two months through structured business-planning support.
- Developed cost-saving reports that contributed to a 15% reduction in expenses.

Analytics & Product Projects

Catch Radius Pressure (CRP) | NFL Big Data Bowl 2026, University Track | Oct 2025 – Present

- Built a new metric quantifying defensive pressure at the catch point from player tracking data across 14,108 passing plays.
- Trained and evaluated a leverage-adjusted catch probability model (AUC 0.855) and produced player and team defense rankings.
- Extended the work into Analytics Practicum research predicting pressure from pre-snap alignment; the research proposal earned a perfect score.

Catch Point Analytics | catch-point-analytics.fly.dev | Live

- Built and maintain a public analytics site (Python, FastAPI, DuckDB, React) with win probability replays and leaderboards across 27 seasons.
- Built ETL pipelines pulling 7,000+ games from the ESPN API and other sources, matching about 99% of 22,500+ records to unique IDs.

Sentry | AI Study Tool | 2026

- Built and deployed a Flask web app on the Claude API that turns lectures into transcripts, summaries, quizzes, and interactive concept maps.

Coverage Shadow | NFL Defensive Coverage Metric | Sep 2026

- Designed and validated a defender coverage metric with a Shadow Over Expected score; published documented code and leaderboards on GitHub.

Boston Airbnb Price & Booking Prediction | BU Team Project | Fall 2025

- Built supervised learning models to predict nightly price and 30-day booking probability for Boston Airbnb listings.

Skills & Activities

- **Programming & Data:** Python (pandas, NumPy, scikit-learn, matplotlib), SQL (PostgreSQL, BigQuery, DuckDB), Git/GitHub, Linux
- **Analytics & Modeling:** Predictive modeling, model evaluation, A/B testing and causal inference, statistical testing, pricing and competitor analysis
- **Tools & Visualization:** Tableau, FastAPI, Flask, React, ETL pipelines, Claude API
- **Certifications:** Google Cybersecurity Professional Certificate, CompTIA

- **Activities:** MIT Sloan Sports Analytics Conference, Attendee 2026
